

The D'Aguilar 2 Ups - General Information

Where are we?

- The event is staged from Frederick Harris Court, Dayboro. It is a private property and for reasons we don't know, isn't 'Sat Nav friendly' (you'll end up coming via Esk if you put it directly into any GPS navigation device and you won't make it without a substantial 4x4!)
- Navigate to Dayboro first (via Petrie from the north and most of the south or via Samford from most locations around the western suburbs).
- The start is 10 km NW of Dayboro (follow McKenzie St onto Mt Pleasant Rd onto Mt Brisbane Rd). If using GPS, ensure that you come via Dayboro or Samford.

Parking

- Parking is at a premium. If you're running with friends we encourage car pooling at least from Dayboro, it will be a huge help if you can.
- The venue is at Frederick Harris Court (link below). Please park as directed and do as much as you can to keep noise to a minimum as we do have a couple of neighbours to consider. (<https://goo.gl/maps/gxg9fjmxVfHo3DBY7>) – as above, the start is 10 km NW of Dayboro (follow McKenzie St onto Mt Pleasant Rd onto Mt Brisbane Rd). If using GPS, ensure that you come via Dayboro or Samford.
- Allow time to walk 500 metres (uphill!) to the start from your car and 20-30 minutes for check-in.

COVID-19 Conditions (yes, they're still there)

- Checkpoints will be largely self-service. They will be manned of course, but in order to keep contact to a minimum, CP crew duties will be limited to checking runners in and out and stocking the CPs as necessary. The exception will be to attend to issues in the event of an emergency.
- There will be hand sanitiser at the start/finish and at CPs, please use liberally.
- When waiting at the start and finish, please be mindful of your social distance – we all like to trade war stories at the end of an event but we have remain conscious of the current conditions in which we need to operate.

The Course

- The course for all events will be well marked and the route will be easily navigable (with the addition some signage in key locations).
- Familiarise yourself with the directions outlined in this document and suggest you use All Trails and/or Maps Me

Note: If you download All Trails and Maps Me you will be able continually monitor your location in proximity to the course.

The D'Aguiar 2 Ups - General Information
